DISK USERS: Insert disk and run 'DIR'. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter 'CLOAD' or 'CLOADM'. If while loading or running a program, you get a FC, OM, cr SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to the 120th issue of T & D Software. We hope you enjoy this months fine selection of software. This software is great for those summer days that you get sunburnt and need something to do in the house

1. NAMEFILE- This program allows you to make a rolladex on disk for you to record phone numbers and addresses with no hassle. Not only does it store names, but addresses and phone numbers, too. To create a new file select 'Save a file' it will input your name, etc. and it is simple to access any file that you need. Just type the number your name was saved as.

2. COMICS- Store comic book information with this database. Lets you store name, the number and the C.O. (whatever that is since I don't collect comic books). View your files at any time by querying for that number.

3. ALPHABET SOUP- The goal of this addictive game is to line up the letters in triples, but not pairs, as they come down. Your energy gage is on the right side of the screen and the list of letters that you can use are on the left side of the screen. Extra bonuses are given for filling the bowl (have fun trying to do this).
